DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This is a 2-1/2 story brick building detached on the left side and is four narrow bays wide and three bays in depth. It has a two story brick "L" shaped wing three bays long and two bays wide surrounded and extended by an old one story frame extension. This together with early front views suggests it was built as a pair of early Federal houses. All brickwork is in common bond. The first floor has a Victorian shopfront with large paned windows, narrow wood framing resembling pillars and plain Doric pilasters. The central entrance has doors of glass over panels and with a high transom. The whole rests on a long granite sill. Granite steps lead to the entrance and to the area of the former doorway of the left bay. The signplate is of metal and states "Quynns Hardware Store-Cutlery, Pants & Bar Iron" with raised wooden anvils on either end. This signplate is framed between "V" shaped round headed symbolic brackets containing raised scrollwork and "Established 1796." This storefront replaces the original Federal facade which had double door entranceways in the second and fourth bays from the left. The doors had glass over panels and were topped by multi-paned transoms and channeled cornice lintels like those now left on the second story. In between the doorways were 1/1 sash house sized windows with the top sash shorter than below. These were headed by moulded lintels and protected by shutters of four panels. The store display consisted of having the more durable wares propped against the building. Above the shop area were wooden signs with names of the co-owners, Allen Quynn and Charles Mantz and "Bar Iron" nailed to the front of the building. Above the store area are four 6/6 sash of handblown glass, narrow framing, and the original channeled wood lintels. The front section side facade contains two 6/6 sash windows lighting the attic and board and batte doors in the center on the second story and attic levels. These were used for warehouse purposes and an old wooden beam hoist is cantilevered above. On the rear is a large 6/6 window with wood lintels and sills. The frame extension has old windows with shutters of six or eight (6 or 8) panels. The front section has a moderate slope "A" frame roof with an extended sidewall curtain on the left side and end buttresses and rests on three string brick cornices on the front and rear. The shed roof of the wing also has end buttresses and rests on a three string cornice. Both roofs are of metal. The building rests on a low fieldstone foundation. Front paving is in a herringbone brick pattern.

STATEMENT OF SIGNIFICANCE					

This firm is believed to be the oldest business in Frederick, and possibly the state, and has been continuously handed down by generations of the same family. It began with the family living upstairs over a small shop selling general merchandise and later enlarged as a hardware store. Many of the old worn wooden counters remain as well as nail bins and an old iron truck to carry bar iron to the rear for cutting. The interior of this store takes you back to a different world.
